Houston, TX 77054

August 30, 2010

Dear Vivante Stakeholder,

We are very pleased to inform you that Vivante GMP Solutions has been acquired by Lonza. As you are probably aware, Lonza is a leading global provider of biopharmaceutical products and services, with locations across the world. Lonza has recently made the strategic decision of entering the viral vaccines and viral vector markets, and Vivante will serve as the platform upon which this strategy will be launched. The organization you knew as Vivante GMP Solutions will now be Lonza's Viral-based Therapeutics Business. Lonza strives to be a market leader for the life science industry, and entering the viral vaccine and gene therapy vector field will be another great opportunity for both Lonza and our customers. As a combined organization, we are already discussing potential expansion of capacity and capabilities.

I speak for every member of the Vivante organization when I say how excited I am to become part of the Lonza team. Lonza Custom Manufacturing has an excellent reputation for superior technical support and process optimization. They take their clients' production goals very seriously, just as we have with our projects at Vivante.

If you are a current or future client, please know that you will be getting a complete solution as a result of this acquisition with the same focus and attention you have always received from the Vivante team. The Houston facility and its staff will be available for your current and future needs. In addition, you can feel confident that we now have the financial stability to grow with you as your programs advance toward commercial launch. Our new Lonza colleagues will bring a wealth of experience and expertise to many other product development needs you may be exploring. We look forward to speaking with you about how we can continue to support both your current and future programs with this added portfolio and capabilities.

I hope that you find this news as positive for your organization as we do for Vivante. We would welcome the chance to visit with you further at your convince. Please feel free to contact me directly at david.enloe@lonza.com, or any member of the Vivante team, now Lonza's Viral-based Therapeutics Business. For more information please contact us at +1 713.568.6190.

Best regards,
